

FISTULA FIRST RECOGNITION PROGRAM

Each quarter, the Network's *Fistula First Recognition Program* assesses facility arteriovenous fistula (AVF) rates and classifies facilities according to their AVF rate maintained for a 3-month period. As the overall Network AVF average rises, we will continue to recognize facilities that achieve rates above the Network average. **The Network 5 area currently has an overall AVF rate of 47.4%**, therefore we are recognizing facilities achieving a 50% or greater AVF rate, which has been maintained for at least three (3) consecutive months. Below are the facility rankings for the 3rd quarter (July, August, and September) of 2008:
